

Case Study

Weaving Our Way to Another Success

Built To Fit Your Needs

Working in collaboration, creating tailored solutions, engineering to improve efficiency.

- **The Application:**

- Our customer one of the leading manufacturers and distributors of flooring products in the United States, required a valve to process small offcuts and waste from their carpet manufacturing process.

- **The requirement:**

- To provide a pair of 500mm offset rotary valves.
 - To process a wide range of particle sizes including long strands and larger sections.

- **The solution:**

- The unique design and profile of the valves helped to prevent product jamming at the nip point of the valve and prevent the valve stalling.

- **The result:**

- The valves meet the customers demanding application and they have already ordered additional units.
